The M-FIRE SL112 EX Zone 0 spotlight is a new addition to the flagship series of the intrinsically safe heavy duty lighting. The spotlight generates light at 222 lm, with the beam reaching up to 432 m. The spotlight is powered by a high capacity battery allowing it to operate up to 4 hours 15 minutes in max power mode, and a staggering 82 hours in eco mode. This amazingly long operating time is the product's key feature. The extremely long operating time is crucially important in emergency situations, such as survival in adverse environmental conditions. The M-FIRE SL112 EX Zone 0 is IP64 and Ex-ATEX certified, not only fully resistant to dirt and water, but also safe to operate in explosion zones. It comes with a flame retardant shoulder strap with a quick-release buckle. The spotlight is recharged through a base that can be vertically mounted, e.g. to a wall.
