

Integral Neck Curtain & Heat Shield for GALLET® F2XR™

Technical Datasheet

Integral Neck Curtain & Heat shield for GALLET® F2XR™ Wildland & Rescue Helmet

Designed for **Wildland Firefighting** and **Technical Rescue** missions, the Integral Neck Curtain and heat shield offer a patented two-part protection system that enhances safety and comfort via a **360° neck and face coverage**. Designed to integrate seamlessly with the GALLET F2XR Helmet and Responder Goggles, the system is also **compatible with particle-filtering disposable masks or half-face respirators**.

Adaptive. Protective. Field-Proven.

- **Patented 2-part concept:** Combines an Integral Neck Curtain and Heat shield for a comprehensive neck and face protection. The heat shield can be deployed only when needed and can accommodate an FFP2/FFP3 disposable mask.
- **Seamless integration** with Responder goggles helps eliminate gaps, offering a fully covered face barrier, while the lightweight and breathable textile enhances thermal comfort.
- **Field-driven design:** A 35 cm elongated flap prevents ash ingress between the jacket collar and neck curtain - directly inspired by feedback from Wildland Firefighters.
- **Certified with GALLET F2XR Helmet:** and tested for radiant heat, thermal and chemical resistance.
- **Modular and versatile:** 3 use combinations: Neck Curtain + heat shield (for disposable masks), Neck Curtain only (for half respirators), and heat shield only (for fire hoods).
