

# NEW: RÖSSLE SUBMERSIBLE PUMPS

## Sewage water/submersible pumps from Rössle – powerful and tough

They are indispensable for fire departments during water-related operations: efficient and resistant sewage water/submersible pumps that easily and quickly pump out the masses of water and suspended matter contained therein. As a supplement to the proven FD vacuum cleaners of the HYDRA series, Rössle AG has added four electric sewage water / submersible pumps to its product range.

The pumps can be used separately or as a support for the FD vacuum cleaners to deal with masses of water even quicker.

The pumping capacities of these sturdy and robust pumps range from 240 l/min (14,400 l/h) to 1,000 l/min (60,000 l/h). All pumps feature class F insulation and are rated to IP 68. With the new sewage water/submersible pumps from Rössle AG, your fire department is well equipped in case of emergency during floods, heavy rain and inundations.

### SUBMERSIBLE PUMP KILO

- Connection: C-coupling
- 220 V 50 Hz
- Inlet grain size  $\varnothing$  30 mm

### SUBMERSIBLE PUMP MEGA

- Connection: C-coupling
- 220 V 50 Hz
- Inlet grain size  $\varnothing$  35 mm

### SUBMERSIBLE PUMP GIGA

- Connection: B-coupling
- 3~ 400 V three-phase 50 Hz
- Inlet grain size  $\varnothing$  11 mm

### SUBMERSIBLE PUMP TERA

- Connection: B-coupling
- 3~ 400 V three-phase 50 Hz
- Inlet grain size  $\varnothing$  11 mm

#### PUMP CHART KILO

#### PUMP CHART MEGA

#### PUMP CHART GIGA

#### PUMP CHART TERA

The diagrams show you the pumping capacity of the Rössle submersible pumps in m³ per hour in relation to the pumping height.

# NEW: RÖSSLE UNIVERSAL SQUEEGEE

## The universal squeegee – simply move away dirt, liquids and co!

When dirt and liquids have to be removed during operations and shovels and brooms do not achieve the desired result, the universally applicable universal squeegee shows its strength.

The removal of water, fire-fighting foam, oil binding agents and other contaminants on any surface is made much easier by the use of the universal squeegee. Even on uneven surfaces, excellent results are achieved because of the flexible thrust surface which adapts to the floor and does not tilt. The universal squeegee is the perfect addition to our FD vacuum cleaners.

- For the removal of a wide variety of soiling in solid and liquid form.
- High chemical resistance of the thrust elements
- Due to the protective shield shape of the thrust surface, liquids are directed in the pushing direction.
- Quick and easy alternate use due to two different sliding surfaces: blue plastic lip and white nylon broom
- The length of the telescopic rod can be easily and quickly adapted by means of the quick-release fastener

The length of the telescopic rod can be easily adjusted in just a few steps.
